

## Men's Leather & Tiger Eye Bracelet Size Guide

1. Wrap a flexible measuring tape or use our printable ruler guide to measure the circumference of your wrist just above the wrist bone.
2. Specify Your Scaling Option Prior to Printing. On your print dialog box, make sure that the page scaling is set to 100%. (You can open that box by pressing CTRL+P)
3. Note the number at the point where the measuring tape meets the 0.
4. Compare your wrist measurement to the chart below to choose the corresponding bracelet size. If your measurement falls between two sizes, we recommend selecting the larger size.

WRIST SIZE	BRACELET SIZE
<u>7.5"- 8.0"</u>	<u>MEDIUM</u>
<u>8.5"- 9.0"</u>	<u>LARGE</u>
<u>9.0"- 9.5"</u>	<u>LARGE - 1X</u>
<u>9.5" - 10.0"</u>	<u>LARGE - 2X</u>

\*If you do not have a flexible measuring tape, use a ribbon, or string and mark it where it overlaps on your wrist. Then measure the length against a ruler.

\* Daneila and Léon shall not be held responsible for any inaccuracies in the measurement of bracelet sizes.
